accredited by

Dear Colleagues,

We would like to invite you to the Upper GI & Bariatric teaching day that is being organised on the 12th Sept 2016 at the Heart of England NHS Foundation Trust. This course is ideal for surgical trainees (ST5 – ST8) in General/Upper GI surgery and trainees planning to sit the FRCS exit exam in the near future. All surgical trainees are welcome but places will be given on receipt of a completed form and payment.

Based on feedback from previous courses, a nominal fee of £100 has been added to cover the cost of organising the course. This includes a reserved parking area for attendees (to book a space, please go to www.qualityvenues.co.uk; PIN 10759; spaces on a first come first served basis and on receipt of payment), refreshments and a hot lunch.

Registration on the day is between 08.00 – 08.30 followed by live operating sessions from two theatres through a direct audio and visual link up, with live moderation. The day will finish at 18.00. Lap trainers will also be available in the Education Centre to practice various knotting techniques. Please confirm your attendance at the earliest opportunity so that we can organise the appropriate catering arrangements. Certificate of attendance will be provided. The cheque should be made payable to **Heart of England NHS Foundation Trust.**
